The Northern Kentucky Urban and Community Forestry Council is an interdisciplinary group of interested citizens and professionals whose mission is to help improve and manage their community's trees and green spaces for future generations.

They provide support to existing organizations and agencies as well as assistance to the development of new groups committed to community tree care. Their goal is to merge man-made and natural environments so both are accommodated and valued.

For additional information about the Northern Kentucky Urban and Community Forestry Council involvement or programs please log on to:

www.nkyurbanforestry.org
